denominación de origen

THE BODEGA

D.O. Ribera del Duero

Address: Ctra. Morcuera s/n

Website: www.avanteselecta.com

Year of foundation: 2004

Average annual production: 300,000

Sub-areas: Located at 7 km from San Esteban de Gormaz, (Soria), Atalayas de Golbán was conceived with the aim of making wines following the style of Ribera del Duero wines while adding the character and personality of the privileged area it resides very close to: the exceptional Valley of Atauta

Vineyards (extension, age, etc.): Atalayas de Golbán covers an extension of 40 hectares of winery-controlled vineyards

Location: In Soria, in the areas closest to the Valley of Atauta, and in the villages San Esteban de Gormaz, Miño, Ines, Soto and Langa

Orography: Mixed

Altitude: Between 950-980 m

Climate: Extreme continental climate with a Mediterranean influence

Average rainfall: 430 mm/year

Soils: Mixed, sands and calcareous clays, cobbles

Age of the vineyard: Between 60 and 80 years of age

Pruning system: Gobelet

Plantation pattern: 2 m x 2 m

Plantation density: 2,500 plants/ha

Average yield: 4,000 - 4,500 kg/ha

Variety: Tinto Fino

Fermentation tanks and vats (stainless-steel, wood, cement, etc.): Fermentation is carried out in stainless-steel vats at a controlled temperature

Ageing: 700 French oak barrels, 225 litres. Used for periods between 0 and 6 years, 25% of the stock is renewed every year

Wines: Viridiana, La Celestina, Torre de Golbán Reserva

ATALAYAS DE GOLBÁN THE BODEGA FURTHER TO THE EAST OF RIBERA DEL DUERO

Atalayas de Golbán is located in the village of Atauta, at 7 km from San Esteban de Gormaz, next to Dominio de Atauta. The grapes used by the bodega to make its wines are grown not only in the Valley of Atauta but also in the region of San Esteban de Gormaz. These wines have a strong Ribera del Duero influence: they are excellent Young, Crianza and Reserva wines with a marked character and strong personality.

The region has a continental climate with a Mediterranean influence and typically very long, harsh winters and short, hot summers. The average rainfall is 430 mm/year, which mainly takes place throughout autumn and spring.

Winter temperatures can reach as low as minus 15 degrees, and during the months of maturation, there is a marked variation in temperatures, registering 28 degrees during the day and 4 or 5 degrees at night. This favours a good phenolic maturity in the grapes.

SOILS

The objective in this area was to find the warmest soils, sands and cobbles, creating conditions for an appropriate maturation in what is one of the coldest areas of Ribera. This also involved the search for slopes facing the north, which receive less sunlight during the hot months of the year, thus allowing for a slow maturation.

VINEYARDS

Atalayas de Golbán has young vineyards with 30 years of age as well as old vineyards that can reach up to 100 years of age, and the aim is to combine concentration and strength without sacrificing liveliness.

WINEMAKING

The wine made at Atalayas de Golbán is carried out respecting the characteristics of each of the regions it works in. Stainless-steel vats are used in the winemaking process, controlling the fermentation with medium-length macerations. Some of the wines made here undergo a short ageing in the barrel that does not exceed three months, and others, such as the Crianza and Reserva wines, are aged for longer periods in French oak barrels; this type of barrel suits the profile of the wines that Atalayas de Golbán intends to create. Before reaching the market, the wine is also bottle aged until it is at its optimum point for consumption.

OUR WINES

Viridiana

Aging: 3 months in new oak barriques

Grape variety: 100% Tinto Fino

Average annual production: 80.000

Viridiana is a young wine with a short ageing with selection of vineyards is carried out mainly searching for a fruity intensity and balance on the palate.
